# How Did He Become a Knight?

One winter day, Assinine was traveling down a road, and found a lost bird floundering in the snow. Donkeys hate snow, and being cold, but Assinine used his hooves and nose to dig the bird out of the snowdrift, wrapped his ears around the bird, and laid his ears back against his neck. His body heat warmed the bird up enough to finish his flight to his warmer winter home. That generosity, and willingness to brave the cold, earned Assinine his entry into the Knights of The Round Bale.
